10.1 The Correction of Rotation Speed Limit - C & U Americas  
The rotation speed limit of bearing refers to the limit value which no friction heat generated in bearing and bearing can continuously operate. (3) Study material

Limiting speed  
Limiting speed at which rolling bearing can work is restricted by many different factors. In the vast majority of cases crucial restriction is working temperature of Maximum RPM Calculator - MicroPoly  
MicroPoly-filled bearings do have speed limitations. maximum allowable speed for a MicroPoly-filled bearing running at room temperature. Limiting Speeds:

Bearing Speed Limits & Calculation | American Roller Bearing  
If grease lubrication is desired, then the speed limit is 66% of the oil limit. Bearing Type, Speed Limit Factor. Narrow, Wide, 2 Row. Radial Bearings. Ball, Deep

[Miniature & small ball bearing]  
What is the limiting speed of Please check as below. This is for a radial ball bearing. The limiting speed ( $n_0$ )  $n_0 = f_1 * f_2 * f_3 * A / d_m$ .  $d_m = (\text{outer diameter} / \text{inner diameter}) / 2$   $f_1 = f_2 = f_3 = 1$ . For grease Speed limitations | SKF | SKF  
Typically, the limiting speed determines the maximum speed for these bearings. Approximate thermal speed limit based on ISO standard conditions. The reference

Limiting speed - Precision RPM Inca. Limiting speed of bearings. The rotating speed of a bearing is normally affected by friction heat generated in the bearing. If the heat exceeds a certain amount, Limiting speeds of high-speed ball bearings considering Mar 13, 2019 — The limiting speeds of high-speed ball bearings are defined considering prevention of skidding and overheating conditions. Results show that

Limiting speed | Basic Bearing Knowledge | Koyo Bearings The rotational speed of a bearing is normally affected by friction heat generated in the bearing. If the heat exceeds a certain amount, seizure or other failures occur, thus causing rotation to be discontinued Limiting Speed - NSK Americas As soon as a bearing reaches or exceeds its limiting speed – i.e. its empirically established The limiting speeds for bearings with grease and oil lubrication
